Weclome to ASG National

RE-IMAGINE THE FUTURE

ASG National is not your standard technology company. We are a team of insurance industry insiders; claims and system development experts from the Property and Casualty market. Ancillary service professionals who have served as both consumers and providers of the services claim professionals use today.

UNIQUE INSIGHT

Our work with employers, carriers, attorneys, service providers and medical professionals over the last 25 years provides us with a unique and diverse perspective from multiple sides of the insurance process. It is this diversity that lead to the creation of The ASG Model and the development of our proprietary web-based platform ASGARD, the only multi-faceted platform of its kind.

OUR MISSION

ASG's goal is to alleviate the burden from insurance professionals at all levels while returning program and project management back to a performance-based decision-making process.

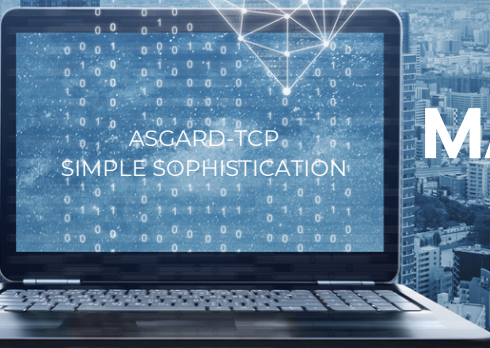

ASGARD delivers clients unparalleled transparency and unprecedented insights into their programs.

WHY ASG NATIONAL

At ASG we take our commitment to innovation seriously. From re-imagining vendor management, and launching our "simple claims" solution to innovative custom development projects, we are here to change the industry for the better.

We maintain a commitment to integrity in our performance. We are never satisfied and always looking for new ways to create efficiencies, introduce automation and increase value to our customers and the industry.

ASGARD CLAIMS

MANAGEMENT

CLAIMS MANAGEMENT SYSTEM

ASG introduced the industry's first employer-controlled, dedicated claim platform that is not tied to a Third Party Administrator, but rather to your program(s). With its unprecedented transparency and insights into your claim program, customizable business logic, Service Level Agreement rules integrations, and a robust selection of optional features, ASGARD is the last data move you will ever have to make.

EMPLOYERS & MUNICIPALITIES

Whether you are a self-insured and administered employer, municipality or a construction developer looking to manage claims on multiple projects, ASGARD has a solution for you. As a stand-alone RMIS system or a window into your TPA's claim activity ASG delivers powerful tools to help you mitigate and manage risk.

CARRIERS

Unbundled carriers face unique challenges with claims often being managed at multiple entities. They face limited visibility and often forced to manage thousands of claim data through spreadsheets or individual system logins. ASGARD offers a single source consolidate and view all of your claim data.

BROKERS

Brokers are tasked with managing multiple clients and programs through many administrative partners. Confronted with limited visibility and transparency. Forced to address problems when they arise at review versus proactively. ASGARD gives brokers the ability to view all their program data consolidated into one system.

ASGARD CLAIMS SYSTEM FEATURES

- Highest level of data security and integrity
- Incident reporting functionality included
- Customizable business logic
- Service Level Agreement rule integrations
- Unprecedented data transparency
- Robust and customizable metrics and reporting
- ASG's proprietary Kronos Timeline
- ASGARD Vendor Optimization system
- Centralized stakeholder communications
- Access to Verisk suite of services
- And more...

The largest U.S. employer benefits from managing claims through a dedicated platform. ASG brings those benefits and more to your program.

EMPLOYER

Your Claims. Your Data. Your Control.

ASGARD enables clients to view meaningful data and performance metrics, in advance of issues truly mitigating risks. Deep data search and reporting functionality deliver transparency into program costs and performance. Integrated business rules create safeguards providing true program control.

→ Your Claims. Your Rules

Why update service instructions when you can build in rules. Enforceable service rules for claims and vendors.

→ Work Smarter. Save More.

Improve efficiencies and improve administrative costs while improving vendor performance and reducing spend.

→ No Claim Left Behind

Your system and your data means everything, now it moves with you! Tail or legacy claims can become a thing of the past.

→ Make Data Work For You

Take advantage of your data and make informed decisions with increased visibility real time, not just at review time.

→ Native Cloud System

Leverage the power of a cloud born system. 100% web based, secure, flexible, powerful, and cost effective.

→ The Power of Choice

Whether it is your TPAs or Vendors you should have the unrestricted freedom to choose and the ability to change.

The ASGARD Claim System is based on a philosophy of simple sophistication. Providing the tools you need without the distractions. More importantly, without the chains of dependency of good faith compliance and someone else's system.

ASGARD puts you in control.

CARRIERS & BROKERS

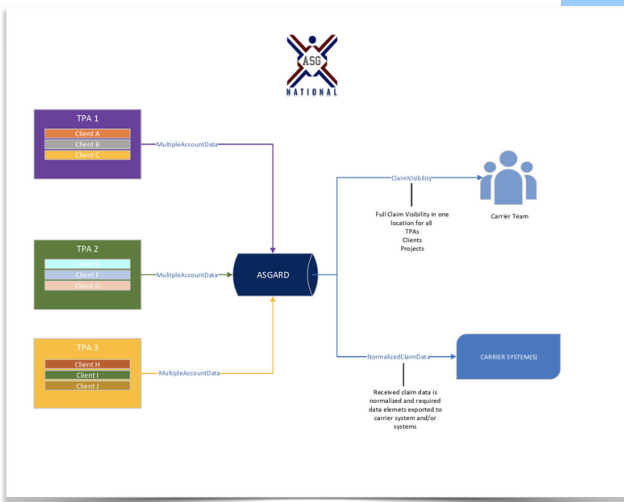

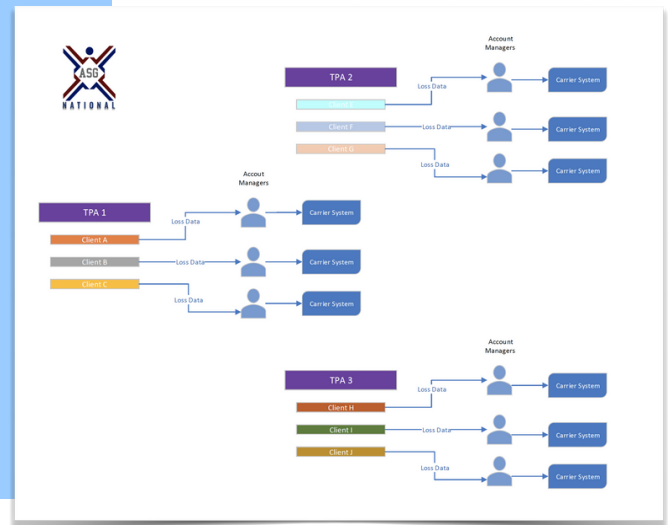

A SINGLE-PANE-OF-GLASS SOLUTION

The industry term for a platform which consolidates multiple systems and process into one application is a "Single Pane of Glass". At ASG we call it ASGARD. The solution for carriers with unbundled program and brokers working with a multitude of clients and program partners, enabling proactive program management and mitigation of risk.

→ The Multi-System Conundrum

Carriers and Brokers are faced with the unique issue of needing to ingest loss and claim data from multiple Third Party Administrators.

- Limited or No Claim Data Access / Visibility
- Multiple manual loss data reports processed
- Ineffective claim communications
- No safeguards - Good faith compliance

→ The Multi-System Conundrum

ASGARD consolidates multiple client and program claim and loss data from multiple sources. Providing you with a single-pane-of-glass view of :

- Claim Data: Notes, Reserves, payments and Documents are able to be viewed
- Performance reporting metrics
- Business logic safeguards ensuring compliance
- Normalized data outputs

ASGARD DATA SECURITY & INTEGRITY

100%

Your data and its integrity is paramount.

ASGARD SECURITY

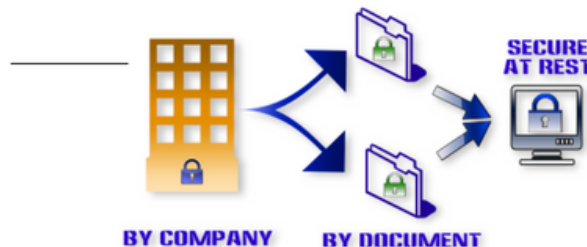

HOLDING TO THE HIGHEST STANDARDS

ASG processes hold to the highest standards of data integrity and security. Whether it is obtaining a Business Associate Agreement, ensuring HIPAA-compliant emails or making sure your data is secure, even when at rest on our servers, we ensure we not only meet but exceed standard security requirements for the industry.

- Data is housed in multiple, redundant data centers located within the United States
- Each data center is SOC, 1, 2, 3; SSAE 16, PCI, HIPAA, and HITECH compliant
- Data is stored with AES-256 encryption and key spaces unique to your organization
- ASG adheres to AWS best security practices
- ASG's ASGARD platform fully logs all record access for every claim

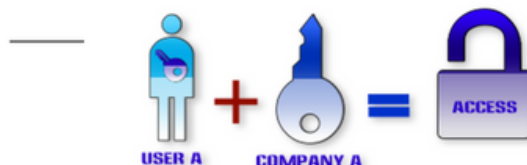

As an extra measure we assign a unique encryption to every document for piece of data in your company.

A.S.G.A.R.D. assigns every company a unique encryption. This is the "lock" to your data realm.

This means every piece of data even when not in use or "at rest" is securely protected within A.S.G.A.R.D.

Every user within a company is also assigned a unique "key" that correlates with the company master.

Both the user and corresponding company keys are required to unlock the secure case data.

WELCOME TO ASGARD

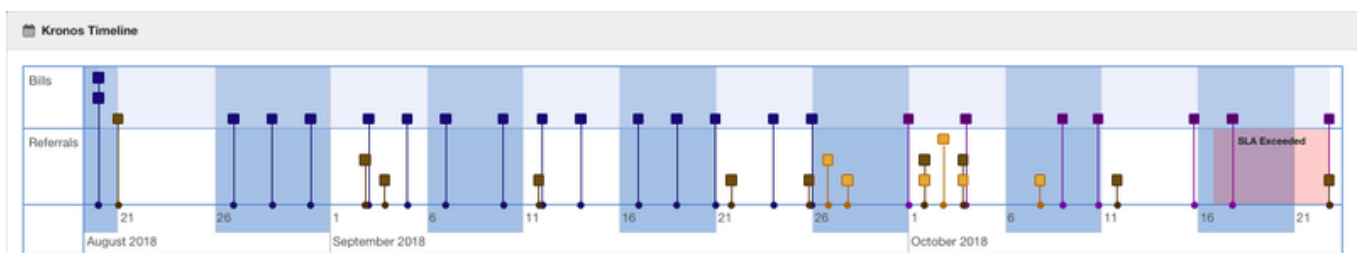

The industry term for a platform which consolidates multiple systems and process into one application is a "Single Pane of Glass". At ASG we call it ASGARD. The solution for carriers with unbundled program and brokers working with a multitude of clients and program partners, enabling proactive program management and mitigation of risk.

DIRECTOR'S DASHBOARD

Our Director's Dashboard provides you with instant visibility to the data that is important to you. ASGARD can display analytics on any data element captured by the system. Enhanced analytic tools are available as well for clients who which totake the deep dive and put their data to work for them.

The Kronos Timeline

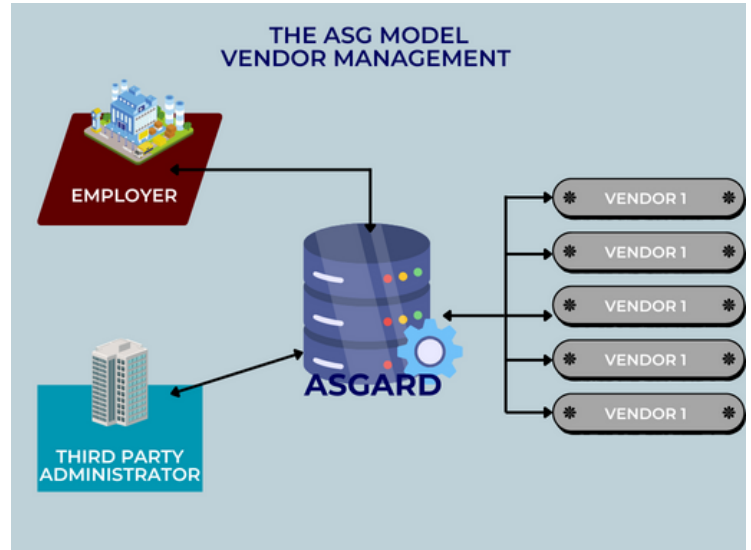

ASGARD's proprietary Kronos Timeline provides a snapshot view of individual claim activity. View treatment bills, indemnity payments, and ancillary service referrals (IMEs, Surveillance, etc.) with the detailed information provided when hovering over an event. Kronos also provides a visual indication when a Service Level Agreement metric has been exceeded. Kronos also enables users to drill down further to a line-item view displaying data and related documents.

WELCOME TO ASGARD

VENDOR MANAGEMENT

Following our single-pane-of-glass methodology, The ASG Model makes managing your ancillary service providers simple and effective. ASGARD consolidates the referral and communication processes for all of your vendors. Providing you with performance data and Service Level Agreement compliance protocols that will enable you to make informed decisions and obtain the best outcomes from your program

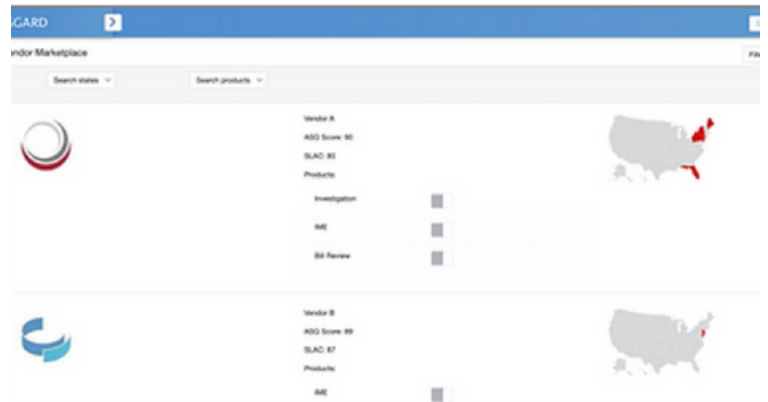

MONITOR VENDOR SPEND

ASGARD provides detailed spend data for your ancillary service program. Important metrics regarding your program's performance and the ability to drill down into individual referral data make it an invaluable tool for your vendor management program.

MIDGARD: THE ASG MARKETPLACE

We believe it is important that every client has the freedom of choice and the ability to change service providers if and when needed. The ASG Marketplace allows you to search for previously vetted service providers, view performance reports and trial new providers on demand. Set trial periods and turn on audit functions for current or prospective vendors.

Additional Services & Partner Programs

DATA & SYSTEM CONSOLIDATION

ASG works with companies to develop customized solutions to assist:

- Consolidate multiple systems data
- Normalize data for uniform output and comprehensive reporting.
- Data and Workflow automation to assist in improving organizational performance.

ASG is proud to have entered into a strategic partnership with Verisk. Verisk provides a wide range of casualty claims compliance services - from MSP services to efficient EDI reporting - as well as proven predictive analytics that improve worker's compensation and liability claims management. Verisk's strong commitment to innovation with more than 30 market-leading solutions designed to improve claims outcomes throughout the life of a claim. ASG clients have access to the Verisk suite of services directly through ASGARD.
